EXPERIENCE

Crew Member

Chipotle | Los Angeles, CA

Apr 2022 - Present

- Cross-trained across all front-of-house and back-of-house stations, supporting team operations and maintaining efficient workflow during high-volume shifts
- Assisted with training and onboarding new employees, helping improve team coordination, communication, and consistency in daily operations
- Collaborated with team members and shift leaders to keep tasks organized, ensure smooth service, and meet performance goals in a fast-paced environment

Team Lead

Senior Design - Workflow Management System (LQTC) | Los Angeles, CA
<https://www.qtcn.com/>

2025 - 2026

Drove full-stack development and team coordination for a workflow management system, spanning architecture design, database modeling, authentication, and code integration

- Addressed communication gaps by establishing regular stand-ups and progress tracking, improving team coordination and reducing missed deadlines
- Coordinated task delegation, code integration, and version control using Git, maintaining consistent collaboration across contributors
- Acted as primary liaison between team members, resolving technical misunderstandings and ensuring clear requirement interpretation
- Reviewed and debugged team code, providing constructive feedback that improved code quality and reduced integration issues
- Architected an MVC-based system to improve maintainability and streamline team development across multiple components
- Designed and implemented a relational database schema and SQL queries to support efficient workflow tracking
- Delivered a functional system with role-based access control (Admin/User), contributing to a stable and user-oriented final product
